

Three of the world's leading thinkers ask three of the world's biggest questions.

Which one will Toronto choose?

On November 14, for its 25th Anniversary, the Canadian Institute for Advanced Research invites you to join a national conversation, and have your say about what you think is *The Next Big Question* the world faces. **Allan Gregg**, renowned pollster, political analyst and social commentator, will moderate the discussion and debate.

Engage in conversation with these speakers about these questions.

How do our genes make us healthy and sick?

*By Steve Scherer,
genetic interaction
specialist*

What makes people happy?

*By Alex Haslam,
leading social and
organizational psychologist*

How can we build a quantum computer?

*By Daniel Gottesman,
global leader in harnessing the
power of the quantum world*
